24	Cost of Sales (<i>Returns</i>)	530✓		1 050 Dr
Apr 1	Balance b/d			1 050 Dr

QUESTION 1 (b)

Richard should value his inventory at cost or net realizable value, whichever is lower. [1]
This is due to the prudence concept [1] which states that businesses should not overstate their assets. [1]

QUESTION 1 (c)

Profit for the period is overstated. [1]

QUESTION 2 (a)

Xavier needs to perform bank reconciliation in order to check that the difference between the balances in the Cash at Bank Account and Bank Statement is due to the timing of recording the transactions. [1]

QUESTION 2 (b)

Cash at Bank			
	Dr	Cr	Balance
2014	\$	\$	\$
Jun 30 Balance b/d			214 Dr✓
30 Insurance Expense		400✓	186 Cr
30 Rent Income	1 200✓		1 014 Dr
30 Trade Receivable: Lester (Dis Cheq)		149✓	865 Dr
30 Bank Charges		20✓	845 Dr
Jul 1 Balance b/d			845 Dr

QUESTION 2 (c)

[1]

[1]

[1]

[1]

QUESTION 3 (c)

	Effect on Profit for the Period	
Error 1	No effect	[1]
Error 2	Overstated by \$280	[1]
Error 3	Overstated by \$3 000	[1]

QUESTION 4 (a)

$$\begin{aligned}\text{Inventory Turnover Rate} &= \frac{\text{Cost of Sales}}{\text{Average Inventory}} [1] \\ &= \frac{200\,000}{20\,000} \\ &= 10 \text{ times } [1]\end{aligned}$$

QUESTION 4 (b)

- Eric is more effective at managing his inventory as compared to Kelvin.
- Eric has a higher inventory turnover rate of 15 times as compared to 10 times of Kelvin's business. This means that Eric replenished his inventory 15 times which is more frequent than the 10 times in Kelvin's business. Kelvin may have bought his inventory in bulk to enjoy trade discounts for bulk purchases in order to lower his cost of sales. [1] As a result, Kelvin does not have to replenish his inventory as often. [1]
- Another reason may be that even though both businesses are in the same industry, Kelvin may be selling goods that have a better reputation and is able to fetch a higher selling price. Due to the higher selling price, his inventory end up moving slower. [1] Even though his inventory is moving slower, he is able to earn more gross profit per dollar of net sales revenue. [1]

QUESTION 4 (c)

Any one of the following: [1]

- Kelvin can increase the units of inventory sold by advertising and marketing to attract more customers.
- Kelvin can decrease the inventory on hand by keeping just sufficient goods to meet customers' demand and not holding excessive inventory.

END OF MARK SCHEME

Answer one question only

- 4 Ifraan, an accountant at De Sports Equipment, provided the following balances on 1 April 2015.

Cash at bank	\$ 3 770
--------------	-------------

The following transactions took place in the month of April 2015.

- 3 April Purchased golf balls worth \$200 and issued a cheque as payment less 10% trade discount.
- 7 April Paid rental expense of \$1 500 by cheque.
- 11 April Purchased a cupboard worth \$450 to store sports equipment. A cheque payment of \$100 was made and the remaining amount was to be paid to Daisan Ltd at a later date.
- 14 April Withdrew \$750 from the business bank account to be used in the shop.
- 19 April Sold tennis racquets to Mervin Enterprise on credit at a list price of \$2 400. A trade discount of 20% was given. The credit term stated that Mervin Enterprise would receive a 10% cash discount if payment was made within 10 days. The cost of the tennis racquets was \$1 100.
- 20 April Mervin Enterprise returned damaged tennis racquets bought on 19 April at a list price of \$250.
- 23 April Received commission income of \$300 in cash.
- 26 April Received a cheque from Mervin Enterprise for the sale made on 19 April.
- 30 April The bank statement for April 2015 showed that the cheque banked in on 26 April was dishonoured.

REQUIRED

- (a) Prepare the journal entry for the transaction on 19 April. [2]
- (b) Prepare the cash at bank account for the month of April 2015. [8]
- (c) State **two** reasons why a cheque may be returned dishonoured by the bank. [2]

- e) > Ah Chew Pie Ltd has a higher inventory turnover rate than Ah Seng Pie Ltd. ✓
 > This means that Ah Chew Pie Ltd is selling goods more quickly than Ah Seng Pie Ltd. ✓
 > Ah Seng Pie Ltd might have too many goods on hand. ✓
 > Ah Seng could have been having difficulties to sell goods to customers. ✓
 > Having such a high inventory turnover rate, nearly two times more than Ah Seng Pie Ltd could mean that Ah Chew Pie Ltd is selling more than what it can replenish. Over time, Ah Chew Pie Ltd might struggle to meet customer demands. ✓
 > Ah Chew Pie Ltd might not be able to meet rising customer demands with such a high inventory turnover rate. ✓
 Accept any 3 answers. [3]
 f) > Reduce selling prices of goods. ✓
 > Offer discounts to encourage customers to buy in bulk. ✓
 > Give special promotions to encourage customers to buy products. ✓
 > Advertise and market its products more to entice customers. ✓
 > Keep just sufficient goods to meet customer demands and not hold excessive inventory. ✓
 Accept any 2 answers. [2]

[Total: 18]

3a) Net assets = \$(12,870 + (8,350 - 1,250) + 750 + 4,420 + 2,400) - \$(11,940 + 1,600)
= \$14,000 ✓✓ [2]

ii) Working Capital Ratio = $\frac{\$(12,870 + (8,350 - 1,250) + 750 + 4,420 + 2,400)}{\$(11,940 + 1,600)}$
= 2.03 (2 dec. places) ✓✓ [2]

iii) Acid test ratio = $\frac{\$(7,100 + 750 + 4,420)}{\$(11,940 + 1,600)}$
= 0.91 (2 dec. places) ✓✓ [2]

- b) > Merlie & Sisters Ltd has an acceptable working capital ratio of 2.03:1 which is close to the acceptable norm of 2:1. ✓✓
- > This means that the business has sufficient current assets / twice as much current assets to pay off its short-term debts. ✓✓
- > Merlie & Sisters Ltd does not have an acceptable acid test ratio as its ratio is 0.91:1 which is lower than the acceptable norm of 1:1. ✓✓
- > This means that Merlie & Sisters Ltd might not be able to pay all its current debts when they are due. ✓✓
- > Merlie & Sisters Ltd could obtain a bank loan to improve on its working capital ratio and acid test ratio. ✓✓
- > Merlie & Sisters Ltd could also sell inventory at a lower price or offer bulk discounts so as to generate more cash. ✓✓
- > Merlie & Sisters could avoid having too much excess inventory on hand. This would result in there being more cash to fund operations and pay off debts. ✓✓

Students have to mention the two points underlined to get the first two marks.
Any of the 6 remaining points mentioned will earn a student a max of 2 marks.

HOUANG POA PRELIM 2016 PAPER 2
SECTION A
Answer ALL questions

Q1 The following balances were extracted from the books of Milk Photographie on 31 May 2016.

	\$
Capital	177 700
Photography fees income	454 100
General expenses	86 000
Wages and salaries	65 600
Insurance	25 000
Discount received	1 800
Rent income	1 200
Motor vehicle at cost	96 000
Property at cost	350 000
Accumulated depreciation:	
Motor vehicle	8 600
Property	30 000
Trade receivables	142 300
Trade payables	27 000
Bank overdraft	15 100
Interest on bank loan	600
4% Bank loan, repayable 31 December 2020	50 000

Additional information

- 1 As at 31 May 2016:
 - (i) Photography fees of \$5 200 is yet to be received.
 - (ii) \$2 300 of the insurance paid is for June and July 2016.
- 2 Interest on the 4% bank loan is not fully paid up.
- 3 A debtor who owed \$1 300 was written off as irrecoverable. This had not been recorded yet.
- 4 Following a review of trade receivables, \$1 200 from Jasmine and \$900 from Chong Jie were estimated to be uncollectible as at 31 May 2016.
- 5 Annual depreciation is charged as follow:
 - (i) Motor vehicle at 25% per annum on net book value.
 - (ii) Property at 10% per annum on cost.
- 6 A repayment, \$25 000, on the 8% bank loan is to be made during the financial year ended 31 January 2017.

REQUIRED

- (a) Prepare the income statement for the year ended 31 May 2016. [8]
- (b) Prepare the balance sheet as at 31 May 2016. [12]

[Total: 20 marks]

Q2 A-Pixels has supplied the following information about his business.

Year ended	31 December 2014	31 December 2015
Sales revenue	\$320 000	\$380 000
Total expenses	\$22 400	\$45 600
Gross profit margin	22%	25%
Profit margin	15%	???
Markup on cost	25%	???

REQUIRED

- (a) Calculate the following profitability ratios (to 1 decimal place) for the year ended 31 December 2015. Show all workings clearly. [3]
(i) Profit margin [3]
(ii) Markup on cost [2]
- (b) Using the appropriate figures, comment on A-Pixel's profitability over the two years. [6]

A-pixels discovered that as at 31 December 2014, a batch of inventory costing \$5 400 had a net realizable value of \$5 150. No adjustment was made. This batch of inventory was subsequently sold in 2015.

REQUIRED

- (c) State the effect of the non-adjustment on the:
- (i) Profit for the year ended 31 December 2015 [1]
(ii) Ending inventory as at 31 December 2015 [1]
(d) State the basis of inventory valuation. [1]

[Total: 14 marks]

Q3 Geoff Studio does not keep a complete set of records. The following information was provided for the year ending 31 December 2015:

	1 January 2015	31 December 2015
	\$	\$
Trade receivables control account	14 500	20 500
Trade payables control account	12 400	15 800
Inventory	13 200	11 300

The following transactions took place during 2015:

- Credit notes issued to customers 5 250
- Cheque received from credit customers 28 000
- Cheque paid to credit suppliers 25 000
- Total discount received 700
- Cash purchases 500

REQUIRED

- (a) Prepare the trade receivable and the trade payables control accounts. [8]
(b) Prepare the inventory account. [3]
(c) Prepare the trading portion of the Income Statement for the year ended 31 December 2015. [3]

[Total: 14 marks]

SECTION B

Answer ONE question only

Q4 Groovy Studios is a commercial advertising company. The following errors and omissions were discovered:

- 1 Sales returns from a credit customer had been entered on the wrong side of both accounts.
- 2 Goods purchased on credit from Jamine had been entered into Jamie's account.
- 3 A receipt of \$824 issued for a cash sales to Red Cosmetics had been recorded in the cash book as \$248.
- 4 Purchase of stationery worth \$54 has been recorded into the office equipment account.

REQUIRED

- (a) Name the type of errors from items 1 to 4. [4]
- (b) Prepare the journal entries to correct each of the errors 1 to 4. Narratives are not required. [4]
- (c) Copy the following table into your multi-column papers. Taking into account items 1 to 4 above, calculate the adjusted profit after the correction of errors. [4]

	\$
Profit before correction of error	12 500
Error (1)	
Error (2)	
Error (3)	
Error (4)	
Adjusted profit after correction of errors

Q5 Mengo, a clothing retailer, had the following information on trade receivables that are unlikely to be collectible for the three years ended 30 September 2014 to 2016.

	Trade receivables unlikely to be collectible as at 30 September	Total trade receivables as at 30 September
2014	Zaha Cotton In \$ 600 \$ 800	\$3 920
2015	Wush Puppies Niki \$ 330 \$ 540	\$ 5 700
2016	Hang Nine \$ 400	\$ 12 600

Additional information:

- (i) On 5 March 2015, a credit customer, Crocks, who owed \$250, could not be contacted. The business decided to write off his debts as irrecoverable.
- (ii) On 9 April 2016, Birkenes, who owed \$2 400, was declared bankrupt and was ordered to pay \$0.40 for every dollar owed. The remaining amount was to be written off as irrecoverable.

REQUIRED

- (a) Explain, with the use of an accounting concept, the need for Mengo to prepare an allowance for impairment of trade receivables. [2]
- (b) Prepare the allowance for impairment of trade receivables account for the years ended 30 September 2014, 2015 and 2016. [7]
- (c) Prepare the Income Statement extract for the year ended 30 September 2015. [2]
- (d) State the effect on the profit for the period when a trade receivable is written off from the books. [1]

Current portion of long-term borrowings		<u>25000</u>	
		68500	
Total liabilities & equity		<u>496950</u>	

Q12

a(i) Gross profit = $0.25 \times 380000 = \$95000$

Profit = $95000 - 45600 = \$49400$

Profit margin = $49400 / 380000 \times 100 = 13\%$

(ii) Cost of sales = $380000 - 95000 = \$285000$

Markup on cost = $95000 / 285000 \times 100 = 33.3\%$

b) - Gross profit has increased from 22% in 2014 to 25% in 2015.

- This is likely due to increase in sales, as can be seen from the increase in sales revenue from \$320000 to \$380000.

- The markup on cost has also increased from 25% to 33.3%, suggesting that the business could have purchased from a cheaper supplier to lower its cost of purchases.

- The profit margin has however decreased from 15% in 2014 to 13% in 2015.

- This is likely due to an increase in operating expenses, as can be seen from the expenses almost doubling from \$22400 in 2014 to \$45600 in 2015.

- Overall, the profitability of the business has decreased.

[any other suitable answers]

c(i) Profit will be understated.

(ii) No effect on ending inventory

d) Inventory is valued at the lower of cost or net realizable value.

Section A
Answer all questions.

- 1 The following balances were extracted from the books of Max Pte Ltd on 30 June 2016

	\$
Issued share capital, 100 000 ordinary shares	220 000
Retained earnings	49 400
5% bank loan payable 31 March 2020	40 000
Interest on bank loan	1 500
Sales revenue	85 800
Sales returns	4 300
Cost of sales	57 700
Land and buildings	180 000
Motor vehicles	85 000
Accumulated depreciation:	
Motor vehicles	17 000
Utilities	3 600
Wages and salaries	6 800
Rental income	6 000
Trade receivables	23 800
Trade payables	19 200
Cash at bank	33 500
Allowance for impairment of trade receivables	3 700
Inventory	44 900

Additional information:

- Utilities have been paid for 15 months from 1 July 2015.
- Rental income received in advance amounted to \$1 200.
- Interest on bank loan was accrued on 30 June 2016.
- During the year, \$3 000 worth of goods was stolen. The insurance company agreed to compensate \$2 600. This amount was not paid to Max Pte Ltd as of 30 June 2016.
- \$4 000 of the bank loan is repayable on 31 October 2016.
- Depreciation is to be charged at 20% per annum on the net book value of motor vehicles.
- Trade receivable of \$1 800 for a bankrupt credit customer was not written off yet.

RIVERSIDE POA PRELIM 2016 PAPER 02 3
NAME () CLASS

8. A review of the trade receivables showed that debts amounting to \$1 600 may be uncollectible.
9. On 26 June 2016, dividends of \$0.02 per share were declared. The dividends would be paid on 1 August 2016.

REQUIRED

- (a) Prepare the income statement for the year ended 30 June 2016. [12]
- (b) Prepare the balance sheet as at 30 June 2016. [8]

[Total: 20]

- 2 The following information were extracted from the books of Khairul Trading for the financial years ended 31 May 2015 and 2016

	31 May 2015	31 May 2016
	\$	\$
Furniture	55 000	70 000
Inventory	9 800	22 100
Cash at bank	6 000	5 000
Cash in hand	2 700	1 300
Prepaid repairs	400	800
7% long-term borrowings (repayable in 10 years)	-	20 000
Trade receivables	9 300	11 000
Trade payables	12 500	14 000
Interest income received in advance	600	500

REQUIRED

- (a) Calculate the following for each of the years ended 31 May 2015 and 2016. Show all working. Correct to two decimal places where necessary. [4]
- (i) Working capital ratio (current ratio)
- (ii) Quick ratio (acid test ratio)
- (b) Using the ratios calculated in part (a) above, compare and comment on the changes in the working capital ratio and quick ratio between 2015 and 2016. [6]
- (c) State one possible reason for the increase of inventory in 2016 and one effect that the increase of inventory may have on the business. [2]
- (d) Suggest two ways in which Khairul Trading can improve his working capital. [2]

- 3 On 1 June 2016, Jazz Trading had a balance of \$3 700 in its inventory account. It had the following transactions in June 2016:

Jun 4	Sold \$1 600 worth of goods on credit for \$2 800
12	Purchased goods from ADL Supplies on credit, which issued an invoice for \$2 400 list price, and a trade discount of 20% was given.
15	Customer returned half of the goods sold on 4 June.
23	Returned damaged goods purchased on 12 June. The list price of the goods returned was \$400.
29	Purchased goods worth \$500 and paid by cheque.

Jazz Trading's financial year ends on 30 June.

REQUIRED

- (a) Prepare the inventory account for June 2016. [6]
 (b) Prepare the cost of sales account for June 2016. [3]
 (c) Using an accounting concept, explain how inventory is valued. [2]
 (d) Explain what trade discount is, and why and when it is given. [3]

[Total: 14]

Section B Answer ONE question

- 4 Yu Ling's draft profit for the year ended 31 July 2016 was \$62 920. After calculating the profit for the year, the following errors were discovered:
- (i) Purchase of fixtures and fittings, \$2 940, on credit from Sung Ki Trading was debited to Sung Ki Trading's account and credited to fixtures and fittings account.
 - (ii) A cheque of \$4 150 was received from a credit customer, William, in full settlement of amount owing of \$4 500. This transaction was not recorded in the books.
 - (iii) The inventory account was understated by \$650 and the cost of sales account was overstated by \$650.
 - (iv) Inventory withdrawn for advertising purposes, \$2 000, was recorded as debit drawings account and credit inventory account.

REQUIRED

- (a) Show the entries in the general journal of Yu Ling to correct each of the errors above. Narrations are not required. [9]
 (b) Show the effects of correcting the above errors on the profit for the year by preparing a statement of amended profit for the year ended 31 July 2016. [3]

[Total: 12]

- 5 Koko Ltd. is a business that sells stationary. The following information relates to the business's motor vehicles on 1 August 2015.

Motor vehicle (at cost)	\$ 356 000
Accumulated depreciation	128 160

On 1 March 2016, Koko Ltd. sold one of their existing delivery vans for \$6 500 cash. This delivery van was bought at \$20 000 on 1 April 2013. On the same day, the business bought a replacement delivery van, \$38 000, on credit from Motor World Ltd.

It is Koko Ltd.'s policy to depreciate motor vehicles at 20% per annum, using the reducing balance method. A full year's depreciation is charged in the year of purchase, but no depreciation is charged in the year of sale.

The business's financial year ends on 31 July.

REQUIRED

- (a) Prepare the motor vehicles account for the financial year ended 31 July 2016. [3]
 (b) Prepare the accumulated depreciation account for the financial year ended 31 July 2016. [3]

- (c) State the double entry, as well as the amount, to record the gain or loss on the sale of motor vehicle when preparing the financial statement. Narrations are not required [2]
- (d) State the effect a debit balance on the sale of non-current asset account would have on Koko Ltd.'s profit [1]
- (e) State one cause of depreciation. [1]
- (f) Explain, using a relevant accounting concept, the need for depreciation [2]
- [Total: 12]

(i) Working capital ratio (current ratio)	Current Assets / Current Liabilities = (\$9800 + 6000 + 2700 + 400 + 9300) / (\$12500+600) = \$28200 / \$13100 = 2.15 : 1 [1]	Current Assets / Current Liabilities = (\$22100 + 1300 + 800 + 11000) / (\$14 000 + 5000 + 500) = \$35 200 / \$19 500 = 1.81 : 1 [1]
(ii) Quick ratio (acid test ratio)	Quick Assets / Current Liabilities = (\$28200 - 9800 - 400) / \$13100 = \$18000 / \$13100 = 1.37 : 1 [1]	Quick Assets / Current Liabilities = (\$35200 - 22100 - 800) / \$19500 = \$12300 / \$19500 = 0.63 : 1 [1]

[4m]

Q2b Explanation based on OF from part (a):

- Khairul's current ratio declined from 2.15:1 in 2015 to 1.81:1 in 2016.
- This means that for every \$1 dollar of current liabilities, the business has \$0.34 less current assets available in 2016 for repayment.
- While the current ratio appeared relatively healthy for 2015 and 2016, the quick ratio suggested otherwise.
- Khairul's current ratio declined from 1.37:1 in 2015 to 0.63:1 in 2016.
- This means that for every \$1 dollar of current liabilities, the business has \$0.74 less quick assets available in 2016 for repayment.
- An analysis of the current assets and current liabilities of Khairul revealed the following which were the probable reasons for the decrease in quick ratio:
 - Increase in amount of inventory by about 125.51% / from \$9 800 in 2015 to \$22 100 in 2016
 - Increase in trade payables by about 12% / from \$12 500 in 2015 to \$14 000 in 2016
 - Positive bank balance of \$6000 in 2015 decreased into a bank overdraft of \$5000 in 2016
- Possible effects/consequences on the business:
 - The quick ratio for 2016 was a sign that not all its immediate debts could be settled as and when they fall due
 - Unable to meet the day-to-day running expenses of the business
 - The ability to maintain its future profit is reduced
 - Funds might not be available for profitable ventures
 - Unable to take advantage of cash discounts as business is unable to pay promptly
 - Reputation of the business will suffer if it cannot meet its liabilities when they fall due for payment

RIVERSIDE POA 4E5N Prelim 2016 Paper 2
Mark Scheme

- 2c Possible reasons for increase of inventory in 2016:
- Increase in selling price of goods, leading to a decrease in sales volume
 - Goods are outdated and do not appeal to customers' demands
- [any one of the above x 1m = 1m]

- Possible effects for increase of stocks in 2016:
- High storage expenses
 - Risk of goods turning obsolete
 - Funds are tied up in stocks and not available for profitable ventures
- [any one of the above x 1m = 1m]

- 2d To improve his working capital:
- Sell off his inventory as fast as possible to raise cash
 - Bring in additional capital in the form of cash
 - Sell off underutilised non-current assets (furniture) to raise cash/ pay off short-term debts
 - Obtain long-term loan to pay off short-term debts
 - Rent out premises to raise cash
- [any two of the above x 1m = 2m]

Accumulated Depreciation Account				
Date	Particulars	Dr. \$	Cr. \$	Bal \$
2015				
Aug 1	Bal b/d			128 160 Cr
2016				
Mar 1	Sale of non-current asset [w1]	✓ 9 760		118 400 Cr
Jul 31	Depreciation [w2]		✓ 51 120	169 520 Cr
Aug 1	Bal b/d			169 520 Cr

[3✓ x 1m = 3m]

[w1] Accumulated depreciation = $[20000 \times 0.2] + [(20000 - 4000) \times 0.2] + [(20000 - 7200) \times 0.2]$
= 9760

[w2] Depreciation = $[(356000 - 20000) - (128160 - 9760) \times 0.2 + (38000 \times 0.2)]$
= 43520 + 7600
= 51120

Sale of non-current asset		3 740	[1]

5d
Profit will decrease [1]

5e
Usage/ wear and tear/ obsolescence / legal limits [1] – any one

5f
According to the matching concept [1], the allocated cost of the non-current asset (expense) must be matched against the income earned from using the non-current asset [1] to derive the profit or loss for the period.

Or

In accordance with the prudence concept [1], assets and profits should not be overstated and losses and liabilities should not be understated [1]. Or Non-current assets will be used in the business for several accounting periods and are subjected to wear and tear, resulting in a decrease in the book value of the non-current assets [1] over the years.
